DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because Figs. 1, 5 and 8, submitted 1/7/02 appear dark and heavily shaded thus making it difficult to determine what is being labeled and illustrated. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claim 10 and 12 are allowed.
3. In regards to claims 10 and 12 the prior art of record fails to explicitly teach replacing the assignments of the locations in the target layout in a stable state within K! combinations of only the selected K members.

It is noted the examiner has used the computer application entitled Ground Control, which is taught by Massive Entertainment (Ground Control Field Commander's Handbook). Said application seems to suggest the replacement of the assignments of the locations of members in a target layout. However, the examiner cannot ascertain if said application uses the same method as is claimed.
